

NEW DESIGN

Dilution Control System

For use with
Reckitt Benckiser Professional
concentrated products

The Perfect Blend of Simplicity, Economy and Performance

ECONOMICAL

- **FREE*** system when you buy Reckitt Benckiser concentrated products.
- High-performance products mean low cost per use.
- Precise dilutions eliminate waste.

*See loaner agreement for more details.

EASY TO USE

- No tools needed for installation** or service.
- Flexible design allows for in-field customization.
- Durable, low-maintenance engineering.

**Ask about available options for installation.

Dilution Control Systems

Innovative Design from Beta Technology

Snap-In Assembly

EASY TO ASSEMBLE AND USE

- Components snap together with no tools.
- Connect multiple units to one water source.
- Easily switch from hands-free to manual filling.

INTELLIGENT ENGINEERING

Reusable Mesh Strainer

- Cylindrical design slows buildup of debris.
- Isolates clogs, allowing continuous water supply to all other units.

Hands-Free Bottle Fill

R-Gap

- ANSI/ASSE 1055B and UPC approved for backflow protection.
- Resistant to limescale buildup.

R-Gap

Metering Peg

- Regulates dilution from outside chemical supply tube. Simply turn to change dilution.
- Features unique channel system that is easily wiped clean. No more trouble calls or damage from unclogging traditional metering tips.

Metering Peg

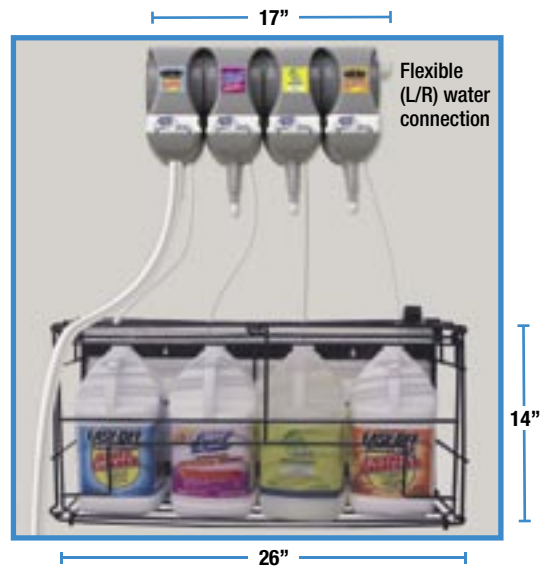

ITEM NUMBERS (COMPONENTS)*

N-1842-0506	Bottle Fill (1 GPM) Unit
N-1843-0506	Bucket Fill (3 GPM) Unit
N-1844-0506	Interconnect (joins units together)
N-1845-0506	Wire Rack/4x1 Gal (26" w x 14" h x 8.5" d)
N-1846-0506	Wire Rack/1x1 Gal (7.5" w x 13" h x 8.5" d)
N-1847-0506	Water Supply Hose
N-1849-0506	Y-Fitting
N-1855-0506	Drilled Cap
N-1856-0506	Cage Lock
N-1857-0506	Product ID Label Sheet

ITEM NUMBERS (LITERATURE)

N-1850-0506	Customer Fact Sheet
N-1851-0506	Installation Manual
N-1853-0506	Dispenser Request Form
N-1854-0506	Distributor/End-User Agreement

* All components will be kitted and included with initial order (see Dispenser Request Form).

For wall installation, recommend leaving a space of at least 12" between dispenser(s) and rack to allow for direct bottle filling.

To reach the Precision Blend Coordinator, or to order forms, call 866-425-9765. For product information (ordering/MSDS information), call 1-800-677-9218 or visit our website at www.reckittprofessional.com
