**SUBJECT: Acrylic Bathtub Liners
Hospitality Accounts**

**SECTION: I
NUMBER: 15
DATE: 6/1/03**

As SOC hospitality properties age, many go through routine room renovations. Tub and surrounding tile replacement are one of the most costly aspects of the entire project. To help hold down these costs, acrylic bath tub liners are often used instead of a tub replacement. These liners are pre-formed acrylic that simply drops into the existing tub, resulting in significant cost savings vs. tub, plumbing and tile replacement.

Upon researching the use of Reckitt Benckiser's professional products on acrylic tub liners, we had the opportunity to request compatibility testing directly from the supplier of PLEXIGLAS® DR® acrylic. PLEXIGLAS® DR® acrylic is one of the material types used by tub liner manufacturers to form the acrylic tub and wall partitions used during many of these restroom renovations.

The following is a list of professional products that have been tested and found to be safe for use on PLEXIGLAS® DR® acrylic when used according to label recommendations:

Professional LYSOL® Brand Disinfectant Heavy Duty Bathroom Cleaner
Professional LYSOL® Brand Pine Action
Professional LYSOL® Brand Deodorizing Cleaner
Professional VANI-SOL® Bulk Disinfectant Washroom Cleaner

Professional products not recommended for use on PLEXIGLAS® DR® acrylic tub liners:

Professional LYSOL® Brand Disinfectant Spray
Professional LYSOL® Brand Disinfectant Foam Cleaner

As a reminder, when presented with a customer request for cleaning/disinfecting any of these acrylic surfaces, always ask to see a copy of the manufacturer's recommendation for surface maintenance.
